EVWA 27

The Most Enjoyable Family EV Festival in the World.

Türkiye's first public electric vehicle festival

WHEN

30 September to 3 October 2027

WHERE

Antalya, Türkiye

THE FESTIVAL LINE

Feel the EV Future

AT A GLANCE

The Most Enjoyable Family EV Festival in the World.

EVWA27, Electric Vehicles World - Antalya, is Türkiye's first public electric vehicle festival, held every year. It opens in Antalya, Türkiye, from 30 September to 3 October 2027, and it is built for people, families and the millions of visitors who are already in the city when it opens.

Every electric vehicle event in the world today is a show, an expo or a fair. EVWA27 is a festival. It runs from eight in the morning to eleven at night. One ticket includes all food and all drinks with an all-inclusive wristband, cooked on site by the participating hotels of Antalya. Children have their own zone and their own driving school. Electric cars race in an arena, parade through the night under lights, and the evening closes with a drone show in place of fireworks.

Electric cars hold the center of the stage from the first hour to the last. Visitors see the newest models, sit in them, photograph them and drive them. Nobody has to care about electric cars to have one of the best days of the year.

4 days

Thursday 30 September is the trade, press and VIP day. Friday 1 to Sunday 3 October are the public days.

15 hours

Each festival day runs from 08:00 to 23:00, in three distinct parts.

30,000

Paid visitors planned for the first edition, 33,000 in all.

80

Electric vehicles on display, with 40 exhibitors.

6 languages

Turkish, Russian, German, English, Polish and Arabic.

1 ticket

An all-inclusive wristband: all food and all drinks, all day, at the stations of the participating hotels.

IN PICTURES

A day out for everyone.

Families, friends and visitors from every country, through the gates from ten in the morning.

THE IDEA

A festival, not a show.

The word festival is used precisely. It is the category EVWA27 creates, and as of today it is the only event in it.

A show runs in daylight hours, mostly indoors, for people who already care about electric cars. Visitors walk a floor, look at vehicles, buy their own lunch and go home in the afternoon.

A festival runs long. It runs into the night. It is built for families rather than enthusiasts. It feeds people. It has music, light, spectacle and food. Children belong there, and so do grandparents. It is a day out that people choose for the day itself, not for the subject.

> **A Mediterranean festival where people see, sit in and drive the electric vehicle future.**

WHAT DEFINES EVWA27

- Cars first, always. The quality and presentation of the vehicles govern every other decision.
- Contact over display. Open doors, sitting inside, photography and unhurried discovery are the core of the day.
- Built for two audiences at once: the families of Antalya and its region, and the international visitors staying in the city.
- Mediterranean in character: warm, open, relaxed and photogenic, with an evening rhythm that suits the destination.
- Practical as well as inspiring. The Life with an EV zone answers real questions about charging, cost, solar and daily ownership.
- Six languages on the ground. Visitors are hosted in their own language, not merely signposted in it.

IN PICTURES

Cars first, always.

Every car open, every seat to sit in, and a host to answer every question.

THE FESTIVAL DAY

Fifteen hours, three experiences.

The festival day runs from 08:00 to 23:00. It is not one long day but three distinct experiences, each with its own character, its own audience and its own reason to be there.

08:00 to 10:00	**The quiet hours**	Before the gates open, the site belongs to press, creators, sponsors and invited guests. Cars stand clean in the early Mediterranean light, with shooting positions mapped and vehicles booked in slots. Sponsors host breakfast.
10:00 to 14:00	**The morning**	The gates open into calm. No queues, no crowds, driving experiences available on arrival. The premium window for serious buyers, older visitors and families with small children.
14:00 to 18:00	**The afternoon**	The family hours. The site fills, the Kids Zone runs at full capacity, the arena program rotates, and workshops, talks, chef demonstrations and vehicle presentations run side by side.
18:00 to 23:00	**The evening**	The signature of the festival. The lights come up, the air cools, music starts, the main sitting of food begins, and the show program builds to the final hour.

FOUR DAYS

DAY	DATE	WHO IT IS FOR
Thursday	30 September 2027	Trade, press, tour operators and VIP guests, by invitation.
Friday	1 October 2027	Public day
Saturday	2 October 2027	Public day
Sunday	3 October 2027	Public day

IN PICTURES

Morning, afternoon and night.

The grounds in the morning light, the children's driving school in the afternoon, the parade at night.

THE EXPERIENCE

Everything included, cars at the center.

One ticket. With its all-inclusive wristband, all food and all drinks, all day, from the first hour to the last, at the stations of the participating hotels. Food is also sold at concessions, at an extra charge.

Hosted by Antalya's hotels

Each participating hotel runs its own station, with its own chef, its own signature dishes and its own name above it. They are not catering an event; they are showing the world what Antalya does best. A judged award closes the festival, because the hotels compete.

Built for families

No alcohol is served anywhere on site, at any hour. Children are present throughout and members of the public are driving. Re-entry is free and unlimited, and the shuttle network runs both ways until the site closes.

THE CARS HOLD THE CENTER

- Visitors sit in the cars: open every door, adjust every seat, put the children in the back, take every photograph they want, with no salesperson and no pressure.
- They drive. A working fleet runs scheduled driving and passenger experiences on the public days, so that visitors without a license, and children with their parents, are included.
- They understand. Multilingual hosts answer real questions about range, charging, cost and daily ownership.
- They see cars first. Brands stage Turkish and regional model launches on the main stage, in the evening, under lights.

LIFE WITH AN EV · CHARGERS, SOLAR & SMART LIVING

The supporting zone for everything that comes with living with an electric car: fast and home charging, solar and home energy, smart energy systems, accessories, installers, and financing and insurance. It is secondary in size and weight; the cars hold the main stage.

IN PICTURES

Hosted by Antalya's hotels.

Chefs from the hotels of Antalya cook all day, and the all-inclusive wristband covers every plate and every drink at their stations.

IN PICTURES

Life with an EV.

Fast charging, home energy and mobile power, shown by the people who make them.

SPECTACLE

The arena, the children, the night.

The arena

One arena, built once, running a different program every few hours. Electric drag racing, two cars head to head from a standing start, silent and instant. Precision and stunt driving by professional drivers. Simulators and driving experiences. The same arena carries the children's driving school, the launch reveals and the parade route.

The Kids Zone

Supervised, enclosed, staffed and wristbanded, so that parents can leave their children in safe hands and go and look at cars. Inside: an electric driving school that issues a printed license with the child's photograph, electric karting, ride-on vehicles for the youngest, and solar car workshops.

The night

After dark the festival becomes something people talk about for a year. The arena under lights. The EVWA Parade every night, with every brand's cars lit and moving slowly through the crowd to music. Projection mapping across the site. A drone show to close.

> **A generation of Antalya's children will get their first driving license at EVWA27, and it will be electric.**

There are no fireworks at EVWA27. They are replaced by drones, and on purpose: battery-powered flight closing an electric vehicle festival, silent, precise and impossible to look away from.

IN PICTURES

The arena and the night.

Racing under the lights, launches on the main stage, and drones in place of fireworks.

THE PLACE

Why this can only happen in Antalya.

Every part of the festival depends on the others, and the whole depends on the place.

The climate

A festival that peaks outdoors, late in the evening, in comfortable warmth, in early October. Few places in the world make this possible.

The hospitality

No other city can call on this concentration of hotels, chefs and all-inclusive skill, or has hotels with a reason to compete for the chance to feed a festival.

The audience

Antalya welcomed 17.12 million visitors in 2025, and 5.57 million foreign visitors in the first half of 2026 alone. They are already here in the festival window, from dozens of countries, in a holiday frame of mind. They do not have to be brought here.

The rhythm

Antalya lives late. Families walk, eat and stay out together into the night, across three generations. A festival that comes alive after dark is how this city already works.

SIX LANGUAGES, ONE AUDIENCE

Turkish, Russian, German, English, Polish and Arabic: on signs, tickets, hosts, safety briefings, the stage program and all content. Antalya's visitors arrive from across Europe, Central Asia and the Gulf, and the festival is built to welcome each of them properly rather than serve one market and translate for the rest.

THE VENUE

The venue of EVWA27 is not confirmed yet. It will be announced on evwa.net.

IN PICTURES

Only in Antalya.

Between the sea and the Taurus mountains, warm into the night in early October.

IN PICTURES

The halls.

Makers from every part of the electric world, from scooters and e-bikes to chargers and buses.
